MIDWAY PASSENGER TRANSPORT BY RENTED BUSES

Fleet Management

We believe in providing all the student and passengers, safe, secure and reliable transportation by:

- **Video Surveillance System** – All buses are installed with CCTV surveillance system, it is inevitable that the rambunctious and energetic nature of children will sometimes override the proverbial “eyes in the back of the head,” and allow them to keep children in check while navigating the route to or from school.
- **GPS Tracking System** – All buses are equipped with GPS tracking devices to get real-time information with the help of GPS tracking for convenience, safety and quick action in case of emergencies. The control room monitors the movement of the vehicle and the driving pattern of the drivers round the clock.
- **Sleeping child check button** – Leaving a child unattended inside the bus is a challenge faced in the school transport system which is eliminated through the concept of No Passengers Board or sleeping child check button to ensure no child left behind in the bus.

Staff management

Midway Passenger Transport has a management structure which ensures administrative accountability and exceptional client service.
